SUMMARY

MCA graduate (2025) with knowledge of Manual Testing, Functional Testing, Regression Testing, Integration Testing, System Testing, API Testing, Test Case Design, Bug Reporting, SDLC, STLC, and Agile methodology. Familiar with test execution, API validation using Postman, SQL, cross-browser testing, and documenting test results. Passionate about delivering high-quality software and continuously improving software quality through effective testing practices.

SKILLS

QA Testing: Functional Testing, Regression Testing, Smoke Testing, Sanity Testing, Integration Testing, System Testing, UI Testing, Cross-Browser Testing, Test Case Design, Test Scenario Creation, Test Execution, Bug Reporting, Defect Tracking, SDLC, STLC, Agile Methodology

API Testing: Postman, REST API Validation

Bug Tracking & Test Management: Azure DevOps (Sprint Management)

Database: SQL

Tools: Chrome DevTools, Chrome Lighthouse, Google Analytics

Technical: Java, HTML, CSS

EXPERIENCE

Clyrex Private Limited

Junior Quality Engineer Intern

Panchkula, India

Nov 2025 – Present

- Performed end-to-end manual testing of web applications, covering functional, sanity, smoke, regression, integration, system, UI, usability, and cross-browser testing.
- Designed, executed, and maintained test cases and test scenarios based on business requirements and application workflows.
- Tested complete order and purchase flows, validating each stage of the transaction and matching application behavior with corresponding records across multiple database tables.
- Performed database validation using SQL to verify order, subscription, membership, transaction, and other backend records against frontend behavior.
- Performed API testing using Postman by validating REST API requests and responses and verifying data consistency between frontend, And API.
- Performed CMS testing to verify that website content could be created, updated, managed, and correctly reflected on the live website.
- Tested AI chatbot functionality using multiple test cases and scenarios to validate chatbot responses, functionality, and expected behavior.
- Performed cross-browser and cross-device testing to identify UI, functional, responsiveness, and compatibility issues across different devices and screen sizes.
- Performed video compatibility testing across different browsers and devices to ensure videos loaded and functioned correctly.
- Performed website analytics testing by validating user visits and engagement data and comparing analytics results with Azure data and benchmark websites.
- Used Chrome DevTools and Chrome Lighthouse to investigate UI, browser, and website performance-related issues.
- Identified, documented, and tracked defects in Azure DevOps with clear steps to reproduce, expected results, actual results, and supporting evidence.
- Managed and monitored Azure DevOps sprint tasks, tracked defect status, and maintained visibility of open, resolved, and closed bugs.
- Performed sanity and regression testing after fixes to verify resolved defects and ensure existing functionality was not affected.
- Collaborated with developers, QA team members, and stakeholders to discuss defects, clarify requirements, validate fixes, and ensure quality delivery.

PROJECTS

Responsive Business Website

GitHub

- Designed and executed manual test cases for UI, functionality, regression, and usability testing of a responsive web application.
- Performed cross-browser testing and documented defects with clear reproduction steps.
- Validated application functionality against business requirements and recorded testing observations.
- Prepared test execution reports and verified resolved issues through retesting.

Merchant Dashboard & Auto-Ledger System Testing Project

GitHub

- Created and executed test cases for order management and transaction features.
- Performed functional, integration, and regression testing to validate application behavior.
- Verified REST API requests (GET, POST, PUT) using Postman between frontend and backend.
- Performed database validation using MySQL to verify order records and transaction data.
- Validated ledger calculations for delivered and cancelled orders.
- Identified, reported, retested, and documented defects related to validations, order processing, and financial calculations.

EDUCATION

Panjab University

Master of Computer Applications (MCA) – First Division

Chandigarh, India

2023 – 2025

INTERNSHIP

GeeksforGeeks

Software Testing Intern

Online

- * Learned software testing concepts including SDLC, STLC, Manual Testing, Functional Testing, Regression Testing, Integration Testing, and Test Case Design.
- * Gained practical exposure to software testing workflows, test execution, defect reporting, and quality assurance best practices.
